

The **TeamCard Virtual Terminal** is a compact software application that provides all the functionality required to participate in the TeamCard Loyalty Program.

It is simple to install and is compatible with most PCs running Microsoft Windows with broadband Internet access. Simply scan or enter a TeamCard Card Number and select an operation from the main screen.

The application will automatically configure itself to the client's requirements: only the functions required will appear on screen and the unit will calculate points awards based on the clients agreed points to £ rate. The software can also display specific promotions, such as "double points" etc., if required.

### Points Award

Select the AWARD button and simply enter the full sale amount of the transaction and the software will automatically calculate the points to be awarded.

### Points Promotion

Select the PROMO button and a set of buttons will appear offering a range of promotions including optional promotions specific to the client. Promotions can be set to only appear at certain times of the day, days of the week and can be set to expire at any time.

### Minimum Requirements

PC Running Microsoft Windows 2000 / XP / Vista

Broadband Internet Connection

### Applicability

Windows based EPOS till (designed for touch screen compatibility)

Where customers are present during the sales process, at a PC

Generally applicable where sale process must be fairly quick and customers are present
